ABSTRACT

The use of medicinal plants is a fundamental component of Indian traditional healthcare system. It is the oldest and most used health care system among all therapeutic systems. In many parts of India and specifically here in Odisha this traditional system of healing is the mainstay healthcare system. These undocumented but locally proven system has a potential for research for the benefit of human race which is all most at end point of contemporary healthcare system. The present article deals with the database usage of nearly 14 species of medicinal plants found around Gandhamardhan hills, Nrusinghnath forest areas in odisha and its important folklore claims.

KEYWORDS: Nrusinghnath forest, Gandhamardhan hills, important folklore claims.

INTRODUCTION

India is famous for its traditional system of medicine which is mostly seen in hilly areas where urbanization has little effect. Out of all hills, the Gandhamardan in Odisha is very important from mythological point. It is said to be the site of *Mrita Sanjeevani* plant that revitalized lord Lakshmana in "The Ramayana".

Nrusinghnath a tiny hamlet in Bargarh district is one among the most remote areas of Odisha. Its about 113kms away from district Head Quarters, Bargarh. It is a tribal dominated area covered extensively by dense forest adjoining the famous Gandhamardhan Hills. It has significant tribal inhabitants like Gond, Kond, Mirdha, barahia, Kharia etc. Although a PHC (Upgraded) is providing contemporary treatment, but still many people depend on the forest and traditional Vaidyas/Babas for various health aliments such as diarrhea, disorders. menstrual fever, iaundice etc. Nrusinghanath is located at 20.55'N, 82.49'E and has an average elevation of 265 meters (869ft).

While documenting folklore claims we found few claims very astonishing. Botanical names, local names, family and usage of the drugs are enumerated and those said plants are preserved in the Department of Dravyaguna, SSN Ayurvedic College & RI, Nrusinghanath, Paikmal, Odisha.

Botanical name -*Pergularia daemia* Family - Asclepiadeaceae
Local name- Uturulli

a) Leaf juice prepared from 5 young leaves is taken in empty stomach along with 1 cup of curd, for 3 consecutive days relieves clinical symptoms of jaundice. This is a very much practiced combination here at Nrusinghanath with proven result.

b) Root powder with milk and applied over boils for a blemish free face.

2. Botanical name- *Costus speciosus* Family- Zingiberaceae

Local name- Kutha

SP Mohanty, KT Rautaray. Some Famous Folklore Claims of Gandhamardan Hill Tribals, Nrusinghanath, Odisha

a) 5 leaves chewed in empty stomach along with 5 black pepper said to be makes diabetes patients free from insulin injection. So locally it is also called insulin *Gachha*.

b) Its roots are used externally to treat inflammatory conditions in cows. The roots are tied around the neck or thigh area of cow to relieve local inflammation and muscle fatigue.

3. Botanical name- Flemingia macrophylla

Family- Fabaceae

Local name- Saval Bhanz

a) One of the most effective and most importantly best alternative drugs for anti-inflammatory activity. This has potential to be used as a substitute instead of *Dashmoola* in similar conditions

b) Root bark is applied locally as a paste in local inflammation.

c) For premature ejaculation, its roots powder taken orally along with ghee.

4. Botanical name- Lygodium flexuosum (Linn)^[1]

Family- Schizaeaceae

Local name- Raktamahajal
